

HACCP IMPLEMENTATION

DATE 11-13 AUGUST 2020

**VENUE PUTRAJAYA/
SELANGOR**

INTRODUCTION

Hazard Analysis and Critical Control Points (HACCP) is a food safety assurance system designed to identify and prevent microbial and other hazards in food production. It includes steps designed to prevent problems before they occur and to correct deviations as soon as they are detected.

Implementation of the HACCP system involves the continual application of the monitoring, record-keeping, corrective action procedures and other activities as described in the HACCP plan.

Maintaining an effective HACCP system depends largely on regularly scheduled verification activities. The HACCP plan should be updated and revised as needed. An important aspect of maintaining the HACCP system is to assure that all individuals involved are properly trained so they understand their role and can effectively fulfill their responsibilities.

UPON COMPLETION

Participant will be able to :

- ☀ Identify the hazards;
- ☀ Establish critical limits;
- ☀ Develop, implement and maintain the HACCP Plan;
- ☀ Verify the overall HACCP system effectiveness.

WHAT COVERS

- 🔗 Food Safety Assurance System
- 🔗 Food Safety Policy
