# METHOD VALIDATION FOR FOOD MICROBIOLOGY ANALYSIS

## INTRODUCTION

One of the most critical factors in obtaining accreditation **ISO/IEC 17025** is to ensure that the analytical methods used for analysis can generate valid data. Method validation is the process of demonstrating that a method is suitable for its intended use.

This training provides general principle of useful validation method performance criteria and associated statistic. Discussion on some case studies will be conducted as well as training with classroom style give opportunity to direct interface with the speaker. Training will include lecture, case study and tests.

*"The training is recommended, well-explained lectures, easy to understand and hands-on."*
